Core Competencies:

Facilities Design:

Olinger Architects expert building design experience allows our team to skillfully guide our clients through the ideation and execution phases of new building and renovation projects. Our team's high performance building design portfolio provides our team with the knowledge to help make our client's goals a reality.

Facilities Management:

Olinger Architects provides professional guidance and assessment for facilities managers. Our team helps property owners to document and evaluate their options for building repairs and capital improvements.

Site Planning:

Olinger Architects works with a team of Civil engineers, Environmental consultants, and Landscape Architects to provide comprehensive site planning services for our clients.

Product Design:

Olinger Architects regularly develops custom product solutions for our clients, and is the inventor of the patented Flycycle High Density Bike Rack system.

Cargo Logistics Infrastructure Design:

Olinger Architects' designed numerous cargo transloading facilities for the Iraq Transportation Network. Our team utilizes our knowledge of Building Information Modeling and facilities design to develop custom transloading solutions for our clients.

Differentiators:

What sets Olinger Architects apart is our application of Building Information Modeling (BIM) Techniques at all phases of design. OA's emphasis on embedding our BIM with robust project information allows our clients to better simulate future construction and track cost from design through building completion. Olinger Architects' better serves our clients with hyper-realistic visual simulations that helps the team reach consensus faster, and communicate more effectively during construction.
